

BUDAPEST UNIVERSITY OF TECHNOLOGY AND ECONOMICS

Further measures in relation to enhanced epidemiological protection March 22, 2020

Further provisions on the organization of study work

1. In accordance with the provisions of the Coordination Committee of 16 March 2020, study activities in the distance education work order shall be completed through the use of information systems. In this work order, provisions of the Code of Studies (CoS) may only be applied if they do not conflict with the measures taken by the Coordination Committee for the enhanced epidemiological protection activities.
2. If a measure taken by the Coordination Committee deviates from the provisions of the CoS, or establishes a different code of conduct, the measures shall be followed and, where appropriate, the provisions of the CoS shall be waived.
3. The study activities and the assessments of the learning outcomes shall be organized in such a way that the student can fulfil his / her prescribed study obligations in a scheduled manner.
4. Assessment of learning outcomes, the result of which is not taken into account in determining the subject mark and is only a condition of eligibility for the exam, may be omitted. In this case, all students enrolled in the course are eligible for the exam (all student get signature entry "Signed" for the subject).
5. Formative assessment (e.g. homework) may be used instead of summative assessment (e.g. midterm exam), if the nature, aims and learning outcomes of the subject allow. The students shall be notified of the modifications in advance and a deadline of at least fifteen days shall be set for submitting the formative assessment.
6. In the distance education work order, the provisions of CoS on identity authentication (Section 136 of CoS) do not apply. In the distance education work order, the instructor shall exercise due diligence and thoroughness in verifying student's identity during the assessment of academic performance following the capabilities of the information systems.
