

# BUDAPEST UNIVERSITY OF TECHNOLOGY AND ECONOMICS

## Further measures in relation to enhanced epidemiological protection March 26, 2020

### **I. Additional provisions on the organization of study work**

The Hungarian Government proclaimed a state of emergency by the Governmental Decree No. 40/2020. (III. 11.) in accordance with paragraph 53 (1) of the Constitutional Law, and further measures were taken by the Governmental Decree 41/2020 (III. 11.). These two decrees – in accordance with the paragraph 53 (3) of the Constitutional Law – are in effect for a period of 15 days, accordingly they shall expire on 27 March 2020.

Paragraph 4 b) of the repealed Decree 41/2020. (III. 11.) prohibits students from entering the university's campuses, therefore, due to its repeal, there will be no legal restrictions from Monday. However, opening of the campuses is still undesirable in the view of the enhanced epidemiological activities.

1. The Coordination Committee states that its measures taken on 11 March, 2020 – particularly Section II./1./a. – are still in effect, and accordingly, students are prohibited to enter the university campuses, even if the referred governmental decree is repealed.
2. From 30 March 2020, BME will continue its education in the form of distance education work order.

### **II. Modification of the Coordination Committee measures of 9 March 2020**

1. Point I.1 of Section I of the measures of 9 March 2020 shall be replaced as follows:

„All BME citizens who have travelled abroad or been in contact with a person who has been infected or quarantined by authorities, shall be self-isolated by home quarantine for a period of two weeks from the date of their return or their last contact with the infected or quarantined person. Direct contact with other persons shall be limited to the necessary minimum, avoiding any contact with communities.”
